Wyndham Community Response Plan

Emergency Management Southland contact details

- **Website:** <https://www.cdsouthland.nz>
- **Phone:** 0800 76 88 45
- **Email:** ems@cdsouthland.nz
- **Facebook:** @cdsouthland (Emergency Management Southland)
- **Instagram:** @southlandcdem

If you would like to become part of the Wyndham Community Response Group or have any questions, please contact Emergency Management Southland.

How to Stay Informed During an Emergency

Visit <https://cdsouthland.nz/useful-things/> for information on:

- Helpful resources
- Tsunami maps
- Weather
- River status
- Power outages
- Roads
- Geonet (Earthquake information)

Local radio stations to listen to during an emergency

Station	Frequency
The Hits	Te Anau 90.4FM & rest of Southland 98.8FM
Hokonui	All of Southland 94.8FM
More FM	Te Anau 96.0FM & rest of Southland 89.2FM
Newstalk ZB	All of Southland 864AM
Radio New Zealand	Te Anau 101.6FM, Milford Sound 92.0FM & rest of Southland 101.2FM
Radio Southland	All of Southland 96.4FM

Antenno

Receive notifications direct to your phone on council services, flood warnings, hazards, roadworks, service disruptions, community events, and more. You can also use Antenno to tell us about things that need our attention, or give us feedback, direct through the app. Antenno is available for free for iPhone and Android devices. Setup is easy and doesn't require signing-up.

Purpose of the Community Response Groups

Community Response Groups before an emergency

The more prepared a community is, the better placed it will be to look after itself and support others during an emergency.

The Community Response Group helps prepare the community by:

- Developing and maintaining this Community Response Plan.
- Identifying local hazards, risks, and community vulnerabilities.
- Providing information on Community Emergency Hubs and community gathering places.
- Maintaining important local contact information.
- Working with Emergency Management Southland to strengthen community preparedness and resilience.
- Reviewing and updating this plan as community needs and circumstances change.

This plan is a living document and can be updated at any time in partnership with Emergency Management Southland.

Community Response Groups during an emergency

During an emergency, the Community Response Group acts as Emergency Management Southland's primary point of contact within the community and provides local community support.

The Community Response Group may:

- Consider activation when local conditions indicate community support may be needed. Emergency Management Southland may discuss the situation with the Community Response Group, however the decision to activate remains with the Community Response Group based on local needs and available capacity.
- Self-activate to provide community assistance when required.
- Share local information and situational awareness with Emergency Management Southland.
- Support communication of key messages to the community.
- Help identify vulnerable people who may need additional support.
- Assist with coordinating available local resources and community-led initiatives.
- Provide a safe and trusted point of contact for community members.
- Support community resilience through local leadership and coordination.

Community Response Groups after an emergency

Community Response Groups play an important role in supporting community recovery and helping communities return to normal functionality.

The Community Response Group may:

- Act as a link between the community and recovery agencies.
- Provide local knowledge to support recovery planning and decision-making.
- Identify community recovery needs and priorities.
- Help communicate recovery information and opportunities to the community.
- Advocate for community concerns and aspirations.
- Support initiatives that contribute to long-term community wellbeing and resilience.

Further information on recovery arrangements can be found in the Southland Recovery Plan at: www.cdsouthland.nz

Community Details

Demographic details

Wyndham is a rural town in the South Island of New Zealand in the Southland Region, located 45km east of Invercargill and 25km south of Gore. The original Māori name of the locality was Mokoreta meaning 'clear and sweet water.' Wyndham is situated on the east banks of the Mataura River, between the Mimiha Stream (river) to the North and the Wyndham (Mokoreta) River to the south. It sits within the Waihopai-Toetoe Ward of the Southland District Council. It covers 2.95km². It has a population of around 600 people.

The name "Wyndham" was first used in the district in 1857, when John Anderson named his runs 161 and 162 Upper Windham Station and Lower Windham Station. The name was soon misspelt as its more common form, Wyndham, and the Mokoreta River became known as the Wyndham River. When the town was established in 1869, it was named after the adjacent river and therefore indirectly after General Sir Charles Ash Windham, who fought in the Crimean War. The town's streets were, in turn, named after events, places, battles and personalities associated with the Crimean War.

Wyndham, Southland, is primarily known as a service centre for the surrounding farming district, with a focus on agriculture and dairy farming. It also boasts a rich history and is a gateway to the Catlins Conservation Park. The town has a strong community spirit and offers various recreational opportunities, including fishing in the Mokoreta, Mataura and Mimiha Rivers.

Identified potential vulnerable sub communities

Emergencies affect all of us. Depending on the nature, extent and timing of an emergency, some people can be more affected than others. We need to ensure equity in response to improve assistance to all in the community. Groups who may need consideration include:

- Wyndham Rest Home
- Elderly
- Community Housing
- Menzies College
- Wyndham Primary School
- Kindergartens
- People with disabilities
- Camping ground
- Tourists/visitors/transient people

Neighboring communities

In an emergency, it's important that neighbouring communities work together to support each other. Nearby communities can provide help if your own community is overwhelmed or unable to meet all its needs. This might include sharing resources like emergency shelters, equipment, vehicles, or trained personnel. Likewise, your community may assist others by sending support when they are in need. Reach out to the following communities during an emergency:

- Edendale
- Mimiha
- Mokoreta

Significant local treasures/ assets

Every community has special places, items, or traditions that are important to its identity — such as marae, historic buildings, taonga, community centres, or natural landmarks. These are considered significant local treasures, and while protecting people is always the top priority during a natural disaster, it's also worth planning how to protect these treasures if it's safe to do so. Following local treasures have been identified by the community:

- Wyndham Memorial archway
- Wyndham Four Square

Wyndham Community Hazard and Risk Summary

Overview

Hazard and risk information serves to provide a clear understanding of the potential dangers that could impact the community. These hazards and risks outline the nature, characteristics, and potential impacts of the hazard, which is crucial to gain an understanding of the dangers the community faces.

1. Flooding

- **Risk Level (Priority):** High
- **Description:** Wyndham is prone to riverine flooding, particularly from the Mataura River, Mimiha Stream and the Mokoreta River. Virtually all of Wyndham's township has a history of flooding. The earliest records occurring in 1861, 1878 and 1913. Wyndham flooded in 1958, the flood banks at Wyndham were upgraded in 1985 to contain a 1978-sized flow with at least 500 mm of freeboard. Before the February 2020 event, the 1978 flood was the largest on record at Wyndham, with a return period of about 50–60 years. During February 2020, the Mataura River recorded the highest flows measured at Pyramid, Gore, Mataura, Wyndham and Seaward Downs. The February 2020 flood approached the design capacity of the flood-bank system through Gore and Mataura. The risk of overtopping at Wyndham was lower than expected due to water spilling onto the floodplain to the west of the town. Subsequent flood alleviation works, including flood banks, have been constructed to increase the protection of the township.
- **Impacts:** Property damage, road closures, isolation, and potential evacuation.
- **Mitigation Strategies:**
 - Maintain drainage systems.
 - Elevate important items in flood-prone areas.
 - Prepare sandbags or barriers.
 - Be prepared to evacuate and aware of changing river conditions and flows.
 - Keep a grab bag ready with essential supplies.
- **Map Reference:** For detailed flood risk maps, refer to Environment Southland's hazard maps:<https://www.es.govt.nz/environment/managing-natural-hazards/town-hazard-summaries/wyndham-flood-risk-summary>
- <https://experience.arcgis.com/experience/9e4fee97e31e47c3a32f6f152be51d34/page/Property-Search>

- Flood Modelling: For more details find the report here [Wyndham Flood Modelling \(2024\)](#)

2. Earthquake

- **Risk Level (Priority):** Medium
- **Description:** While Wyndham is not located on a major fault line, Southland is still a seismically active region. An Alpine Fault earthquake will cause major disruption and isolation to a large area.
- **Impacts:** Building damage, critical infrastructure disruptions, food network disruption, lack of resources and potential landslides.
- **Mitigation Strategies:**
 - Secure heavy furniture and appliances.
 - Develop household emergency plans
 - Practice “Drop, Cover, Hold” Drills.
- **Map Reference:** For New Zealand’s active faults map, refer to GNS Science: <https://www.gns.cri.nz/data-and-resources/new-zealand-active-faults-map/>

3. Severe Weather

- **Risk Level (Priority):** Medium
- **Description:** Wyndham is exposed to a range of severe weather hazards typical of eastern Southland, including strong winds, heavy and prolonged rainfall, snow, ice, and periods of extreme cold. Wyndham’s location near the Maitava River catchment, extensive rural land use, low-lying areas, and reliance on local road networks increase vulnerability to weather-related impacts. Severe weather can affect farming operations, transport links, critical infrastructure, and access to essential services. Climate change is expected to increase the frequency and intensity of heavy rainfall events, resulting in greater flood risk, surface water inundation, and disruption to communities and infrastructure. Recent Southland weather events have demonstrated the potential for widespread impacts from severe rain, wind, and winter weather conditions.
- **Impacts:** Damage of low-lying land, roads and properties, homes, farm buildings, fencing and critical infrastructure disruptions, road closures and community isolation, disruption to food supply chains, farming operations and transport networks, risk to vulnerable populations from cold exposure or loss of services.

- **Mitigation Strategies:**

- Regularly inspect and maintain roofs, gutters and structure.
- Trim trees near power lines.
- Prepare alternative heating and lighting sources.
- Stay informed through weather alerts
- Avoid non-essential travel during severe conditions.
- Keep a grab bag ready with essential supplies.

Map Reference: For severe weather warnings, forecasts and climate hazards, refer to **Metservice New Zealand:** <https://www.metservice.com/>

5. Fire (Rural/Urban)

- **Risk Level (Priority):** Medium

- **Description:** Wyndham is exposed to both rural and urban fire risk due to its surrounding agricultural land, shelter belts, forestry plantations, lifestyle properties, and residential areas. Periods of hot, dry, and windy weather, particularly during summer and early autumn, can increase the likelihood of vegetation fires. Rural fire risk is associated with farming operations, machinery use, controlled burns, and dry grass or forestry fuels. Urban fire risk relates to residential dwellings, commercial buildings, heating appliances, electrical faults, and structure fires within the township. Strong winds common across Southland can accelerate fire spread, threaten nearby properties, and hinder firefighting operations.

- **Impacts:** Threats to homes, businesses, farm buildings, sheds, livestock, forestry resources, critical infrastructure, transport routes, vegetation, environmental values, and public health and safety. Smoke may also impact air quality, visibility, and community wellbeing.

- **Mitigation Strategies:**

- Create defensible space around properties.
- Develop and practice fire evacuation plans
- Comply with fire bans and restrictions.

- **Map Reference:** For fire risk and fire seasons, refer to **Fire and Emergency New Zealand:** <https://www.fireandemergency.nz/> or <https://www.fireandemergency.nz/home-fire-safety/fire-safety-checklists/rural-home-fire-safety-checklist/>

6. Health Emergency

- **Risk Level (Priority):** Medium
- **Description:** Health emergencies, such as pandemics, infectious disease outbreaks, or contaminated water supplies, can significantly impact the Wyndham community. Rural locations may experience reduced access to healthcare services and disruptions to essential supplies. Older adults, young children, and those with existing health conditions may be particularly vulnerable.
- **Impacts:** Community isolation, increased demand on healthcare services, and disruptions to essential supplies and services.
- **Mitigation Strategies:**
 - Promote good hygiene practices, keep hygiene and sanitation supplies at home.
 - Strengthen community support networks and encourage vaccination.
 - Follow public health guidance and know where to access health support in an emergency.
- **Map Reference:** For regional health services and information refer to **Health New Zealand:** <https://www.healthnz.govt.nz/>

7. Biosecurity

- **Risk Level (Priority):** Medium
- **Description:** Biosecurity risks in the Wyndham area are associated with farming, livestock movement, and the transport of goods and equipment. Threats may include animal diseases, plant pests, weeds, and invasive species that can affect agriculture, the environment, and local livelihoods.
- **Impacts:** Agricultural and economic losses, environmental damage, impacts on community wellbeing, and restrictions on the movement of people, animals, and goods.
- **Mitigation Strategies:**
 - Have a farm/life style block biosecurity plan.
 - Farmers should follow MPI biosecurity advice
 - Report any unusual livestock symptoms or pest plans.

- **Map Reference:** For biosecurity threats, responses and reporting refer to **Biosecurity New Zealand (MPI):** <https://www.mpi.govt.nz/biosecurity>

Hazard risk summary table

Hazard	Likelihood	Impact	Priority
Flooding	High	High	High
Earthquake	Moderate	Moderate	Medium
Severe Weather	High	High	High
Fire (Rural/Urban)	Moderate	Moderate	Medium
Health Emergency	Moderate	High	Medium
Biosecurity	Moderate	High	Medium

- **Likelihood:** Probability that the hazard will occur in or impact Wyndham.
- **Impact:** The scale of consequences the hazard would have on the community (people, infrastructure, economy, environment).
- **Note:** This assessment has been based on qualitative judgment and local context to guide how likelihood and impact are rated. For example, flooding is “High” likelihood in Wyndham due to known historical events, even if flood defences are present.

Maps and diagrams (Useful links)

- **Environment Southland Hazard Summaries:** Comprehensive summaries of various hazards affecting towns in Southland, including Wyndham. It provides detailed flood risk maps for Wyndham, illustrating areas susceptible to flooding: <https://maps.es.govt.nz>
- **Seismic Hazard Maps:** The New Zealand National Seismic Hazard Model offers maps indicating earthquake probabilities across regions: <https://www.gns.cri.nz>
- **Natural Hazards Portal:** The Natural Hazards Portal allows exploration of various hazard risks and historical claims data: <https://www.naturalhazardsportal.govt.nz>

Identified local critical infrastructure/ vulnerabilities

Critical infrastructure refers to essential facilities and systems that support the functioning and wellbeing of the community. Damage to or disruption of these assets during an emergency could significantly impact Wyndham's ability to respond and recover.

- Southland District Council 3 Waters (drinking water, wastewater, storm water)
- Power
- Service Stations (Rodgers Garage, Challenge Marshalls Garage)
- Roothing
- Bridges
- Communication

Key Identified Local Resources

The resources listed in this plan are key examples intended to support community preparedness and response. While they represent a broad range of services and support networks, they are not a comprehensive list. Communities are encouraged to identify and connect with additional local organisations, cultural groups, and informal networks that play vital roles in resilience and wellbeing.

Community Emergency Hubs

Community Emergency Hubs provide pre-identified places where the community can gather in the event of an emergency. Not all hubs will be suitable during an emergency, and it is up to the community to decide at the time the safest and most appropriate location. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort and information.

Each pre-determined location will be provided with an Emergency Community Hub Guide and be able to access advice from Emergency Management Southland if they require further information or support. Contact information for the hubs will be available on the following page.

Community Emergency Hub key holders

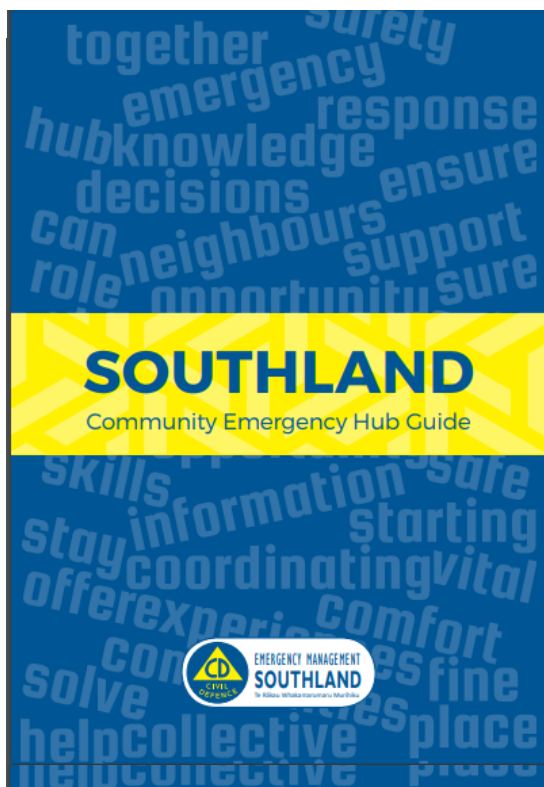

Name	Phone	Address	Key Holders
Main			
Wyndham Memorial Hall	0800 732 732	44 Balaclava Street, Wyndham 9831	Pam Yorke SDC – Chase McDonald
Glenham Community Centre		1013 Wyndham-Letterbox Road, Glenham 9891	Joy Dodd
Mokoreta Hall		1725 Wyndham-Mokoreta Road, Mokoreta	Stu Cameron
Mimihau Community Centre		Mimihau Hall Road, Mimihau 9892	Sarah Dooley

Basic items for a Community Emergency Hub

When opening a Community Emergency Hub, it's essential to bring basic items to support coordination, communication, and community-led response. These items are critical to help the community self-organise, share information, and meet urgent needs during a disaster when emergency services may be delayed. These items may include:

- Water
- Tea, coffee, milk
- Food
- Toilet paper
- First aid kits
- Blankets
- Torches
- Lighters
- BBQ/ LPG bottle
- Games
- Lighting
- Generators/ fuel
- Anything else that you feel is appropriate

Refer to *Southland Community Emergency Hub Guide* for more information on the set up and running of a Community Emergency Hub during an emergency response.

HUB ROLES

1. Hub supervisor

It's important someone has an overview of what is going on. Decisions should be made by agreement, but it's helpful if someone can bring everything together. Remember you're a team, and as a group you'll be able to consider the immediate needs of those in the community, and what community assets and resources are available. The supervisor can change depending on the situation, and as people with more experience join the Hub team they may be willing to step into the role.

I am responsible for:

- Coordinating everything happening in the Hub to ensure it runs smoothly, efficiently and meets its objectives
- Having one person (with input and agreement) who can speak to the media
- Ensuring that everyone understands the role of the Hub and what they need to do
- Ensuring that everyone understands the role of the Hub and what they need to do
- Ensuring that everyone understands the role of the Hub and what they need to do

HUB SUPERVISOR KEY TASKS

- make sure other roles are allocated
- make sure everyone has what they need to do their job
- make sure new people joining the hub are invited to join the team
- make sure each area of the Hub works with the other areas as a team
- record major decisions for future reference, including what happened and any actions taken
- develop a roster to ensure people have adequate breaks and don't work too long
- close the Hub overnight when appropriate
- secure the property and provide information about open times to the community
- let the Emergency Coordination Centre know when the Hub has closed and when it is open again
- close the Hub when the community no longer needs it
- supervise the Hub clean-up when permanently closing
- work with media that show up:
 - do provide any public or general information such as weather details, open hours, and copies of public information such as media releases
 - do not give out private information such as details on injuries or deaths, addresses of evacuated homes or personal information you've received
- Ensure the Hub team understands the following legal information:
 - if you don't have special legal powers in your normal life, you don't have any in a state of emergency either
 - if a situation is life threatening, saving life is the priority, but remember usual laws apply

Community VHF Radio

A community VHF radio (Very High Frequency radio) is a key tool for communication during emergencies, especially when other forms of communication, like mobile phones or landlines, are unavailable due to network failures or power outages. This can be a communities only way to communicate with Emergency Management Southland and the Emergency Coordination Centre (ECC) if telecommunications have been disrupted due to an emergency event. Training to become familiar can be provided. Instructions on how the VHF radio are attached to the radio.

Name	Place	Address	Key Holders
Wyndham Community VHF Radio	Wyndham Memorial Hall	44 Balaclava Street, Wyndham 9831	Southland District Council – Chase McDonald – 0800 732 732 Pam Yorke
