

OTAUTAU

Community Response Plan

Southland has **NO** Civil Defence sirens

(fire brigade sirens are not used to warn of
a Civil Defence emergency)

Please take note of natural warning signs as your first and best
warning for any emergency.

Otautau Community Response Plan 2019

Find more information on how you can be prepared for an emergency

www.cdsouthland.nz

If you'd like to become part of the Otautau Community Response Group
please email ems@cdsouthland.nz

In the event of an emergency, communities may need to support themselves for up to **10 days** before assistance arrive.

Community Response Planning

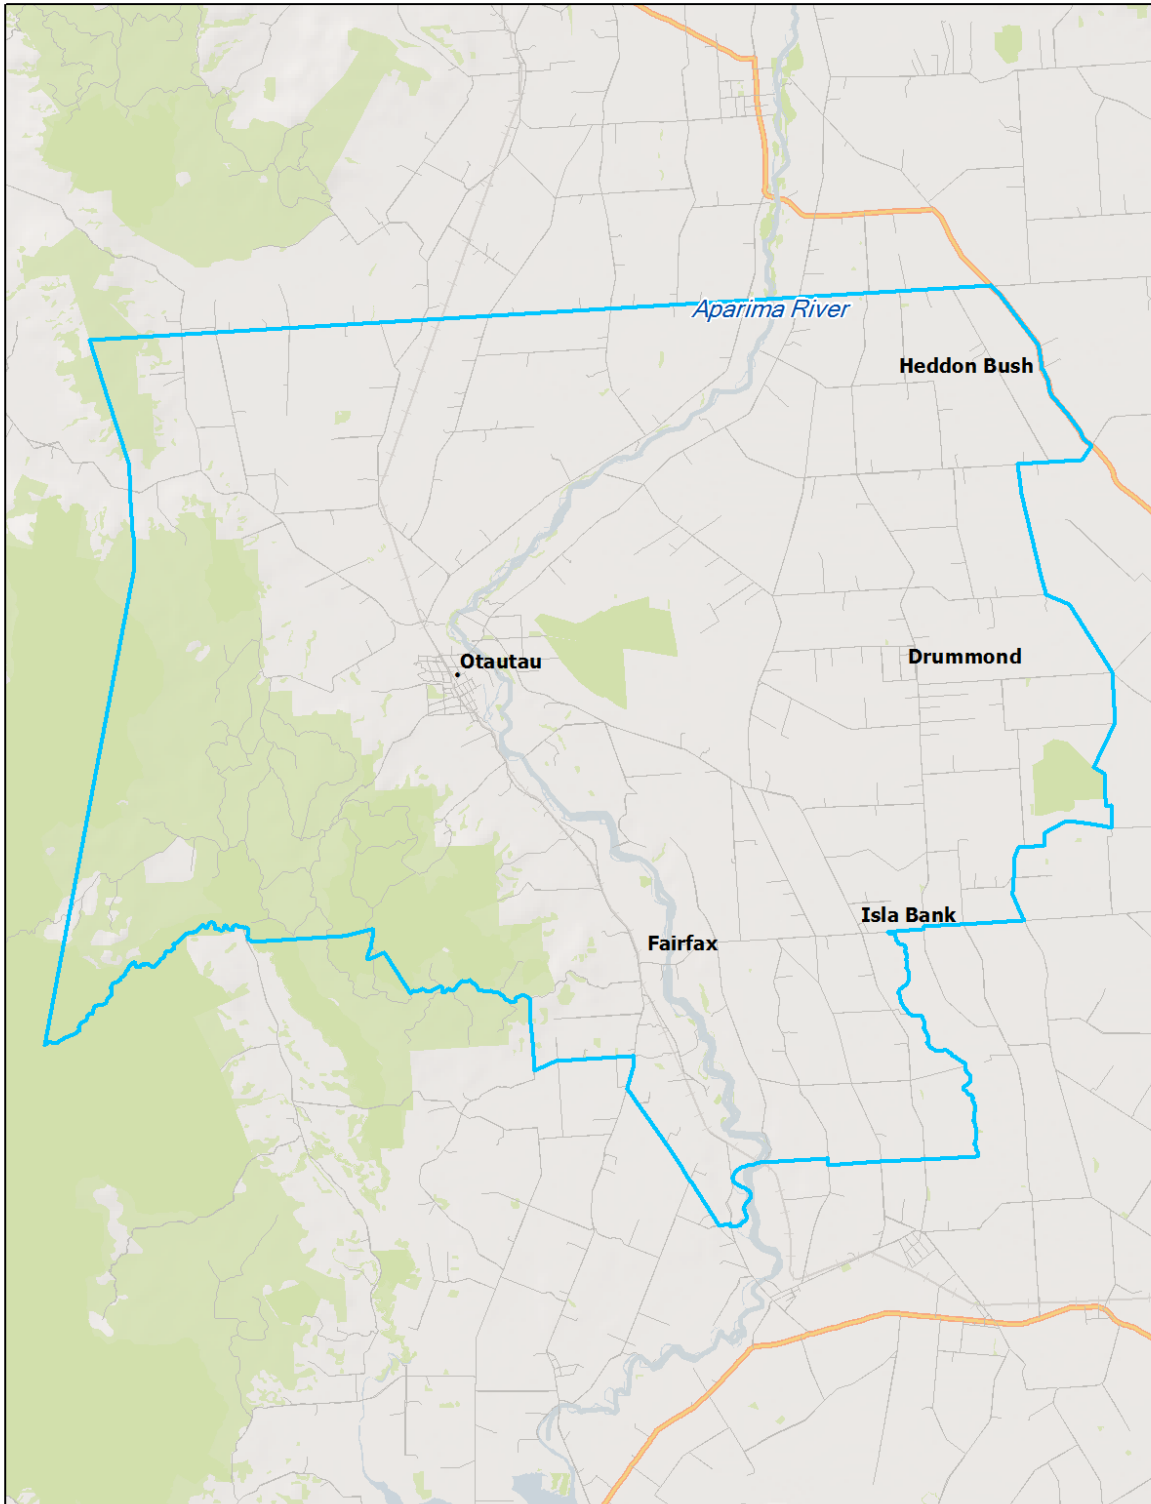

The more prepared a community is, the more likely it is that the community will be able to look after themselves and others. This Plan contains a short demographic description of Otautau, information about key hazards and risks, information about Community Emergency Hubs where the community can gather, and important contact information to help the community respond effectively. Members of the Otautau Community Response Group have developed the information contained in this Plan and will be Emergency Management Southland's first points of community contact in an emergency.

Demographic details

Otautau is a small rural town in western Southland. North-west of Invercargill and east of Tuatapere.

Otautau sits within the Waiau/Aparima ward of the Southland District Council and is in the Aparima Freshwater Management Unit;

- Otautau has a population of approximately 700 and the town services a total population of about 2500;
- Otautau is primarily an agricultural support town with employment in 'agriculture, forestry and fishing' being the largest industry by far;
- the town has a medical centre, pharmacy, plunket, police, ambulance and fire service, one primary school as well as three in the wider district, and two preschool options;
- the broad geographic area for the Otautau Community Response Plan includes Isla Bank, Drummond, Fairfax, and Heddon Bush, see map below for a more detailed indication (Please note that Drummond have created their own plan and chosen to file this under Winton's Community Response Plan;
- this is not to limit the area but to give an indication of the extent of the geographic district. Flexibility needs to be maintained considering that a specific disaster may render existing geographical boundaries irrelevant.

Hazard and Risk information

Potential hazards and risks for the Otautau area include:

Earthquake

- Like much of the South Island, Otautau would be affected during an Alpine Fault earthquake. The most likely impacts for Otautau would be loss of lifelines causing loss of communication, water supply, power and road disruption.

Flooding

- Otautau has been affected historically by flooding, including the 1984 floods with the Aparima River running through the district.

Storms

- Otautau is at risk of storms. Major storms affect wide areas and can be accompanied by strong winds, heavy rain or snowfall, thunder and lightning. They can cause damage to property and infrastructure, affect crops and livestock, and disrupt essential services.

Agricultural and biosecurity

- Otautau plays a role as a service town to the agricultural industry. With 1.5 million hectares of farmland in Central Southland, any impacts to livestock or for land use could have major economic and health impacts especially around psychosocial impacts.

Road Infrastructure damage

- Otautau has a bridge which separates the town in two as well as various other bridges in the district. This bridge also holds vital resources such as sewage, power and water lines. As a commercial hub for a large population, anything which may impact the delivery of goods to service the area needs to be considered.

Pandemic

- The risk of a pandemic in New Zealand remains high and could have an impact on the health and wellbeing of the Otautau community as well as psychosocial impacts.

Identified potential vulnerable sub communities

- Schools: Otautau School (approx. roll 174)
Drummond Primary School (approx. roll 53)
Heddon Bush School (approx. roll 57);
- Otautau Playcentre (approx. roll 18), Drummond Kindergarten (approx. roll 56);
- Elderly in the community;
- Rurally isolated people including migrant employees;
- People with disabilities;
- People with high-risk medical conditions – the medical centre and pharmacists can source this information if needed.

Community Emergency Hubs

Community Emergency Hubs provide pre-identified places where the community can gather in the event of an emergency. Not all Hubs will be suitable during an emergency, and it is up to the community to decide at the time. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort, and information.

Each pre-determined location will be provided with a hub guide and be able to access advice from Emergency Management Southland if they require further information or support.

In Otautau, Community Emergency Hub locations identified by the community are:

- Otautau Combined Sports Complex, 20 Hulme Street, Otautau
- Otautau Scout Club; Thompson Park, Knutsford Road, Otautau
- Otautau Golf Club; Slaughterhouse Road, Otautau
- DT King & Co, 100 Otautau-Wreys Bush Road, Otautau
- Booth Ag, 94 Bayswater Road, Otautau

Don't forget, if you are opening a hub it might pay to think about bringing some basics, such as:

- Water
- Tea and coffee
- Milk and biscuits
- Toilet paper
- First aid kits
- Torches

Community Response Groups into Recovery

Community Response Groups will be vital during the recovery of a community. They will be able act as a connection between the community and the recovery team. They will have key local knowledge and understand the effects of decisions on the local community. They will be able to identify areas of the most importance to the community and suggest ways to work towards the communities' end goals. The process around community recovery will be described in greater depth in the Southland Recovery Plan.
