

TE ANAU

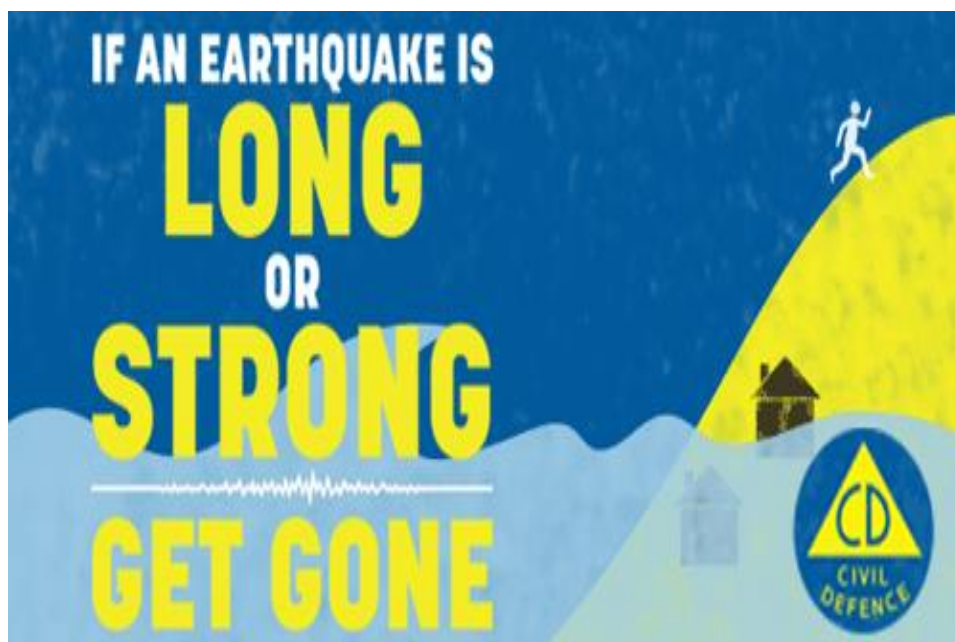

Community Response Plan

Southland has NO Civil Defence sirens

(fire brigade sirens are not used to warn of Civil Defence emergency)

Please take note of natural warning signs as your first and best warning for any emergency.

Te Anau and Manapouri Community Response Plan 2022

Find more information on how you can be prepared for an emergency

www.cdsouthland.nz

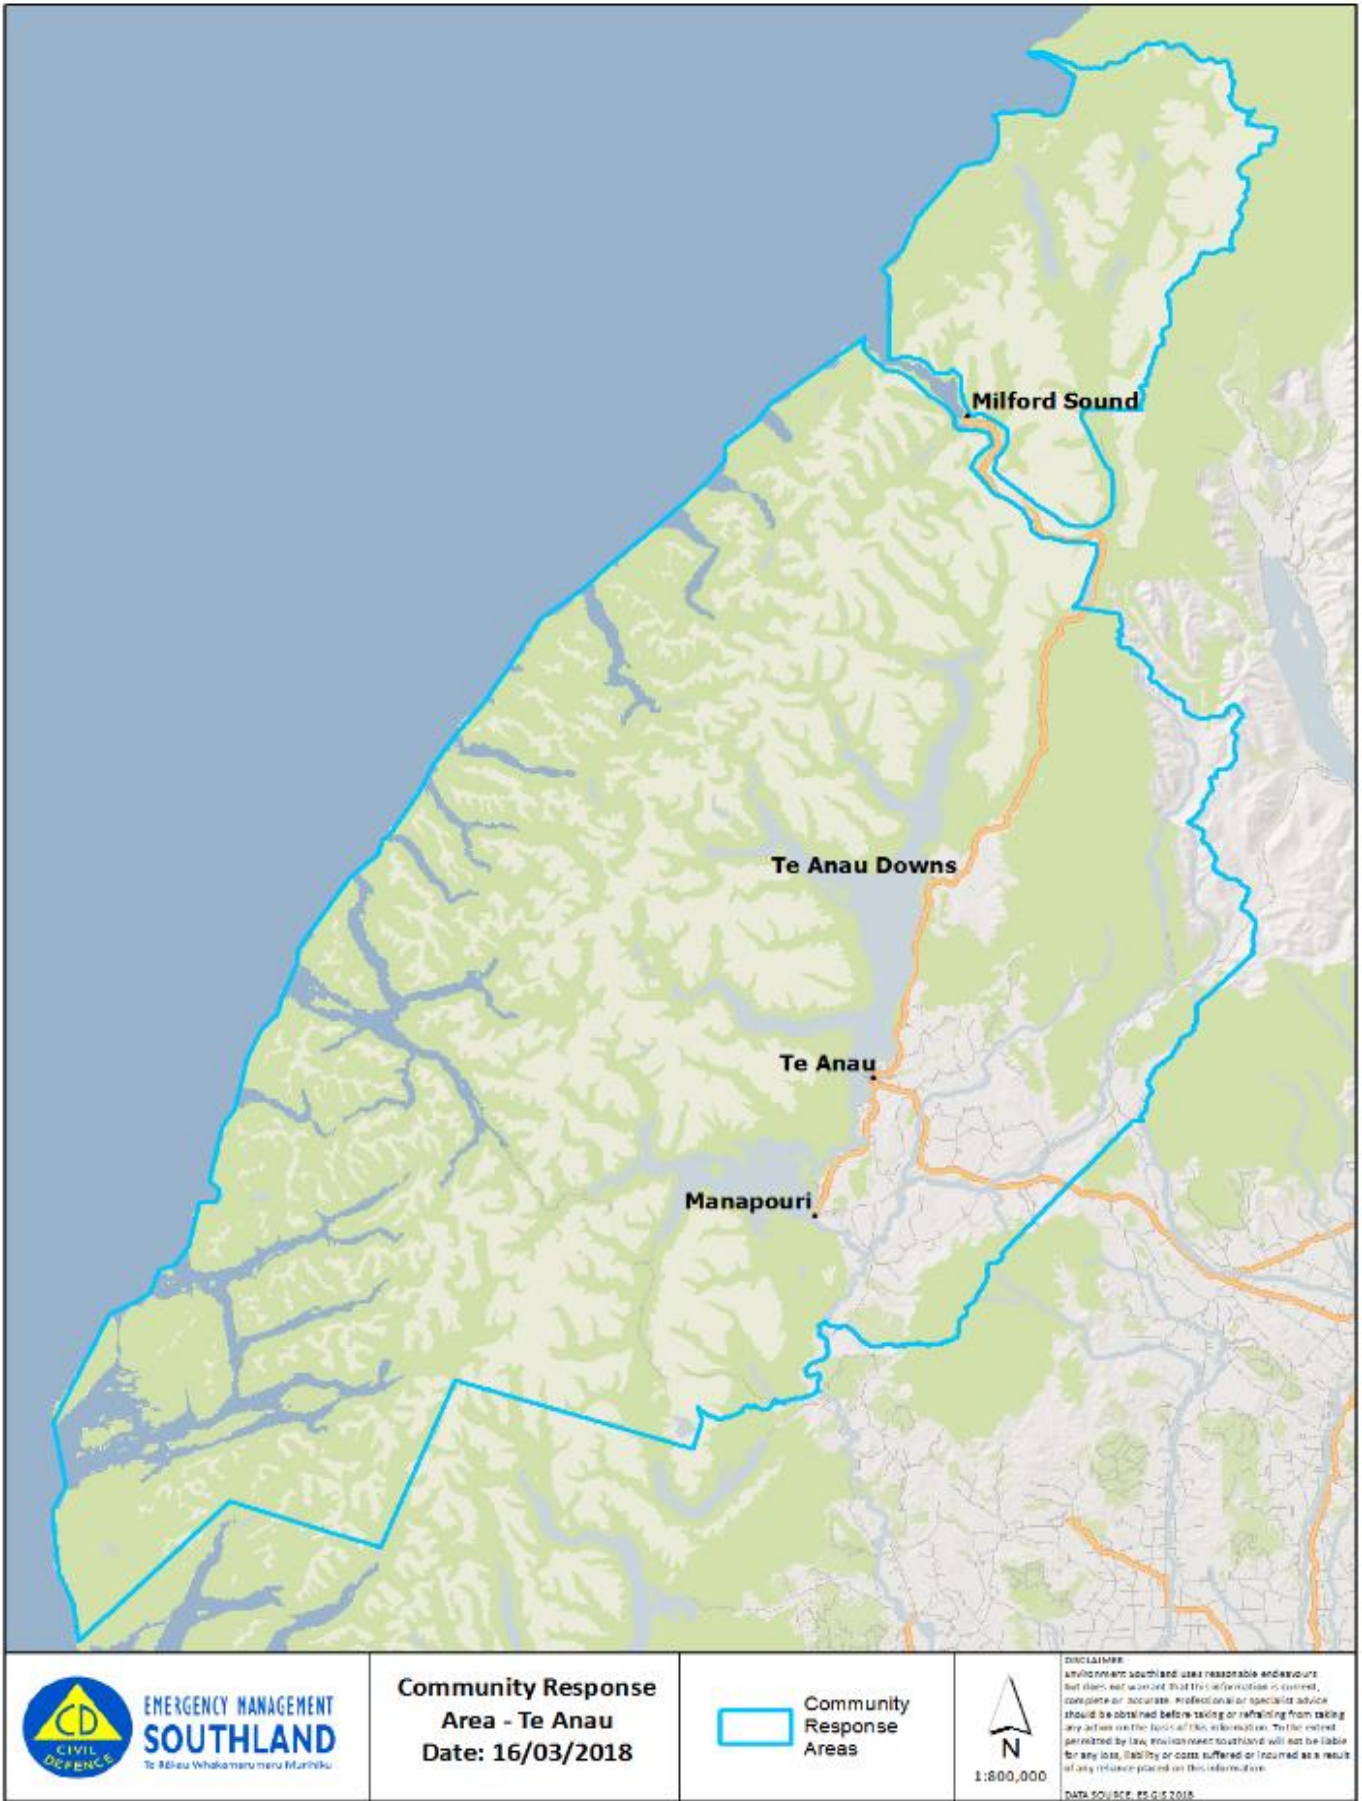

In the event of an emergency, communities may need to support themselves for up to 10 days before assistance arrives.

Community Response Planning

The more prepared a community is the more likely it is that the community will be able to look after themselves and others. This plan contains a short demographic description of Te Anau information about key hazards and risks, information about Community Emergency Hubs where the community can gather, and important contact information to help the community respond effectively. Members of the Te Anau Community Response Group have developed the information contained in this plan and will be Emergency Management Southlands first points of community contact in an emergency. Contact details for helicopter businesses are held jointly by Emergency Management Otago and Emergency Management Southland. The Fiordland Response Plan includes extensive detail for the Fiordland area.

Demographic details

- Te Anau and Manapouri are contained within the Southland District Council area.
- Te Anau has a resident population of approx. 2,750 people. It also has a number of holiday homes.
- Te Anau Airport, Manapouri is located 15 km south of Te Anau and 5 km north of Manapouri, on State Highway 95
- The basin community has people from various service industries, tourism-related businesses, Department of Conservation, fishing, transport, food, catering, and farming.
- The town has a medical centre, ambulance, police and fire service, one secondary school, a primary school, and two preschool options as well as a primary school and preschool in the wider district.
- Manapouri has a resident population of approx. 300 people; a number of homes are vacant as they are holiday homes, it has a fire station.
- A wide range of accommodation provides over 4,000 beds for tourists that frequent the area particularly during the summer months.
- The broad geographic area for the Te Anau Community Response Plan includes the Milford Rd to Lake Gunn, The Key, Manapouri, and surrounding areas, see map below for a more detailed indication.
- This is not to limit the area but to give an indication of the extent of the geographic district. Flexibility needs to be maintained considering that, a specific disaster may render existing geographical boundaries irrelevant.

Hazard and Risk information

Potential hazards and risks for the Te Anau and Manapouri areas include:

Earthquake

- Fiordland region has frequent earthquakes and will be seriously affected during an Alpine Fault event. The most likely impacts for Te Anau and Manapouri would be loss of lifelines, causing isolation with damaged buildings, roads, likely loss of communications, water supply, sewage and power. It is likely to cause changes to the natural environment creating slips and affecting the natural beauty of the surrounding mountains, and possibly affecting waterways and underground water sources.

Flooding

- Flooding can affect Te Anau and Manapouri by cutting access to the basin and to Milford disrupting the ability of tourists to travel and the delivery of essential goods. Bridges are vital infrastructure that also carry telecommunications water and other services across rivers. Failure of the Upukerora bridge would cut off road access to Milford Sound and houses beyond the bridge from essential supplies. Communication services were cut to Te Anau in 2010 when flooding damaged the Whitestone Bridge. High lake levels unlike river flooding can take days to weeks to subside.

Weather

- Heavy snow fall could impact on the ability of tourists to travel and the delivery of essential goods to the region.
- The geography and landscape Fiordland can intensify the tunnelling effect of high winds and pose a significant hazard to those travelling and to buildings.
- Heavy Rain besides causing flooding can trigger landslides.
- The Te Anau basin is a drought-prone area based on climate and soil type. This will affect the area with the demand for water to service the town as well as the farming industry.

Agricultural and biosecurity

- As Te Anau also supports the surrounding farming community, any impacts on livestock and farmland will have major long term impacts on the communities.

Road Infrastructure damage

- Situated on a main tourist route any impact will have large repercussions for the area. All goods that service the area are delivered by road. Any long term closure of the Milford Road and or Doubtful Sound will seriously impact the townships economy.

Identified potential vulnerable sub communities

- Schools – Te Anau School (School (approximate roll 270. Years 0 – 6). Mararoa School (approximate roll 50. Years 0 – 8). Fiordland College (approximate roll 240. Years 7 - 13).
- Kindergarten – Fiordland Kindergarten licensed for 40 children,
- Preschool – The Key Playcentre licensed for 40 children, Te Anau Childcare licensed for 35 children, The Blue Duck Early Learning Centre is licensed for 65 children.
- Elderly in the larger community and Residents of Te Anau retirement housing, Pop Andrew Drive;
- Rurally isolated people including migrant employees;
- People with disabilities;
- People with high risk medical conditions – the medical centre and pharmacists can source this information if needed;
- Tourists

Community Emergency Hubs

Community Emergency Hubs provide pre- identified places where the community can gather in the event of an emergency. Not all Hubs will be suitable during an emergency, and it is up to the community to decide at the time. It is possible that a new venue will need to be found, but the concept of a location where the community gather is vital during a response as people seek immediate support, shelter, comfort and information.

Each pre-determined location will be provided with a hub guide and be able to access advice from Emergency Management Southland if they require further information or support.

In Te Anau and Manapouri the Community Emergency Hub locations identified by the community are:

- Fiordland Community Events Centre – 20 -22 Luxmore Drive
- Te Anau Working Mens Club – Pop Andrew Drive
- Fiordland New Life Church - Blatch Rd
- Fiordland Community House – 21 Luxmore Drive
- Te Anau Rugby Club Rooms - Dusky St
- Manapouri Lakeview Motor Inn – 68 Cathedral Dive, Manapouri
- Manapouri Hall – 11 Hall Road, Manapouri

Community Response Groups into Recovery

Community Response Groups will be vital during the recovery of a community. They will be able act as a connection between the community and the recovery team. They will have key local knowledge and understand the effects of decisions on the local community. They will be able to identify areas of the most importance to the community, and suggest ways to work towards the communities' end goals. The process around community recovery will be described in greater depth in the Southland Recovery Plan.
